BOPPANA GOWTHAM DATTA

Software Engineer

2025 Computer Science Graduate | Frontend-Focused Engineer | Python Full Stack Developer

Python Full Stack Developer with 4+ months of production experience at Alstonair Technologies, Specializing in React frontend development, API integration, and real - time user interactions. Demonstrated ability to build scalable features for real estate platforms, with strong focus on code quality, state management, and agile collaboration.

boppanagowtham04@gmail.com | +91 7893841973 | Bangalore | www.linkedin.com/in/gowtham-datta-boppana-959aa024b

SKILLS

Languages: Python, JavaScript, SQL
Frontend: React, HTML5, CSS3, Tailwind CSS,
Backend: FastAPI, RESTful APIs
Databases: PostgreSQL, MySQL
State Management: Context API, React Hooks
Testing: Selenium, PyTest
Tools & Platforms: Git, Docker, Postman, VS Code, Netlify
Cloud: Azure (AZ-900 certified)

EXPERIENCE

Alstonair Technologies – Software Developer Intern
September 2025 – Till Date

NAL Project (Real Estate Platform)

- Developed **Locality Intelligence features on the landing page**, enabling users to evaluate locality-level insights during the property discovery phase.
- Implemented **Title Search & Property History** functionality, presenting ownership and legal history in a clear and unified interface to improve transparency.
- Built complete frontend pages for **Digital Marketing Services**, **Property Management Services**, and **Marketing Services**, aligned with business offerings and lead-generation goals.
- Implemented **Campaign Management** functionality allowing **sellers and agents** to plan, run, and track marketing campaigns, with **role-based access validation** to ensure authorized usage.
- Redesigned the **Seller Dashboard** to improve usability, navigation flow, and overall user experience.
- Collaborated with backend engineers on **API integration, data consistency, and UI state management**.
- Actively participated in **Agile ceremonies** including daily stand-ups, sprint planning, and code reviews.

OneClick Project (Product Marketing Platform)

- Developed landing and dashboard pages for the OneClick product website, redesigning layouts and aligning the UI with updated business requirements.
- Created a complete project and design document for OneClick, including requirements, workflows, and architecture flowcharts to guide future development.
- Collaborated with seniors to review requirements, refine the information architecture, and ensure all implemented functionalities worked as expected.

NGO Project (Internal Management System)

- Built **responsive and user-friendly UI components** for dashboards, settings, donation flows, staff login, and government hub pages in the NGO management application.
- Redesigned key screens such as the landing page and campaigns page, fixed scroll and image issues, and improved overall **UI/UX** for better readability and navigation.
- Implemented and refined modules like role-based views, HR management, MOU integration, and Donar management, including bug fixing and small frontend enhancements.
- Collaborated with senior developers in stan-up meetings and review sessions to understand requirements, take feedback, and translate them into functional frontend features.

Data Foundry – Software Test Automation Intern

January 2025 – August 2025

- Worked on **Python-based automation and testing tasks**, strengthening core concepts such as control flow, functions, error handling, and modular coding.
- Built and executed **Selenium automation scripts** for functional testing of applications, supporting manual-to-automation transition.
- Assisted in **test case development and execution** for application workflows, identifying defects and edge cases.
- Performed **API testing and data validation tasks**, supporting backend verification and integration checks.
- Worked with structured datasets (e.g., voter lists) for testing and validation purposes.
- Assisted in **document classification and automation tasks**, gaining exposure to real-world testing challenges.

PROJECTS

React Movies App

Dec 2023

- Developed a **feature-rich movie search application using React**, integrating the **OMDb API** to fetch and display movie data.

- Implemented features such as **real-time search, movie detail pages, poster previews, genre tags, and responsive layouts** for multiple devices.
- Focused on **UI/UX optimization** using React hooks and reusable components to enhance performance and user interaction.
- Deployed the application on **Netlify** for fast, reliable access.

Online Grievance Management System

June 2024

- Designed and developed a **web-based frontend application** using HTML and CSS, focusing on **clear structure, usability, and accessibility**.
- Built an **intuitive user interface** that allows users to submit grievances, view status updates, and understand the resolution flow.
- Implemented **structured layouts and visual hierarchy** to support grievance categorization and priority-based escalation.
- Ensured a **responsive front-end design** for consistent usability across different screen sizes and browsers.

EDUCATION

Koneru Lakshmaiah Education Foundation (KL University)
Bachelor of Technology (B.Tech), Computer Science and Engineering – Specialization in Data Science
2021 – 2025 CGPA: **8.14/10**

Aditya Junior College, Andhra Pradesh
Intermediate – MPC Stream
2019 – 2021 Percentage: **69.7%**

Viswabharati High School, Andhra Pradesh
Secondary School Certificate (SSC)
2018 – 2019 CGPA: **9.3/10**

CERTIFICATIONS

- Salesforce Certified AI Associate (2024)
- Google TensorFlow (2024)
- Automation Anywhere University - RPA Professional (2024)
- Oracle Cloud Infrastructure (2023)
- AZ-900 - Microsoft Azure Fundamentals (2023)
